Subject: RE: Estimate: Jack Terminations for Morrill 1, Rm N449

Burt, according to Jim:

phone 5-5992 is moving into one jack. A new phone is going in one jack. A
new fax line is going in one jack.

So each jack is getting one item.

Mary

Jim Hanchett should chime in if I have this wrong, but I believe that each
location should have one phone connection, but the data jacks in those same
faceplates will need to be homerun to the DPH server.

Burt,

My estimate is only for phone system scope items.

I heard that there is a request for at two phones & a fax in that room.
That would require at least one OIT jack, & two if you wanted phones on
opposite sides of the room.

Do you mean that some of those three jacks I saw on the walls of N449 are
not supposed to be wired to the OIT/phone system. If so, you will need to
tell me which ones and we can reduce the scope accordingly.
Send me a detail marked up with what you require.

Graeme

accomplish. As a point of reference, what is desired, as I understand it,

is that the telephone jacks in room N449 will be terminated by OIT so as to provide OIT dial tone. The data jacks to N449 need to be rewired to homerun directly to the DPH server on the second floor, in the Drug Lab offices.
